

HF-SmartLink User Manual

(Android、IOS Platform)

V3.2

- 1 After installed , there is an icon on the desktop of the OS as following picture.

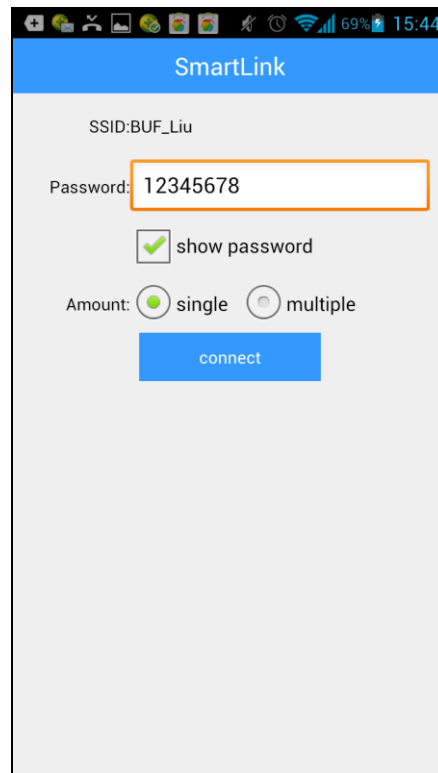

- 2 Connect the Smart Terminal's Wi-Fi to router and click the icon to start the program.

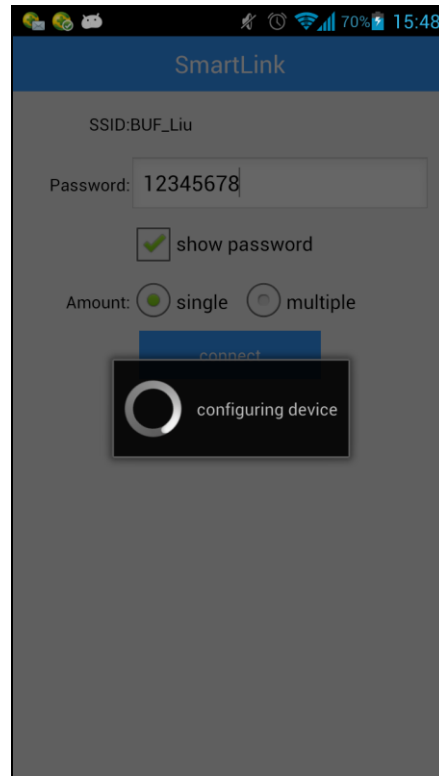

2.1 SSID : The SSID of router which Smart Terminal is connecting to.

2.2 Password : The password of router.

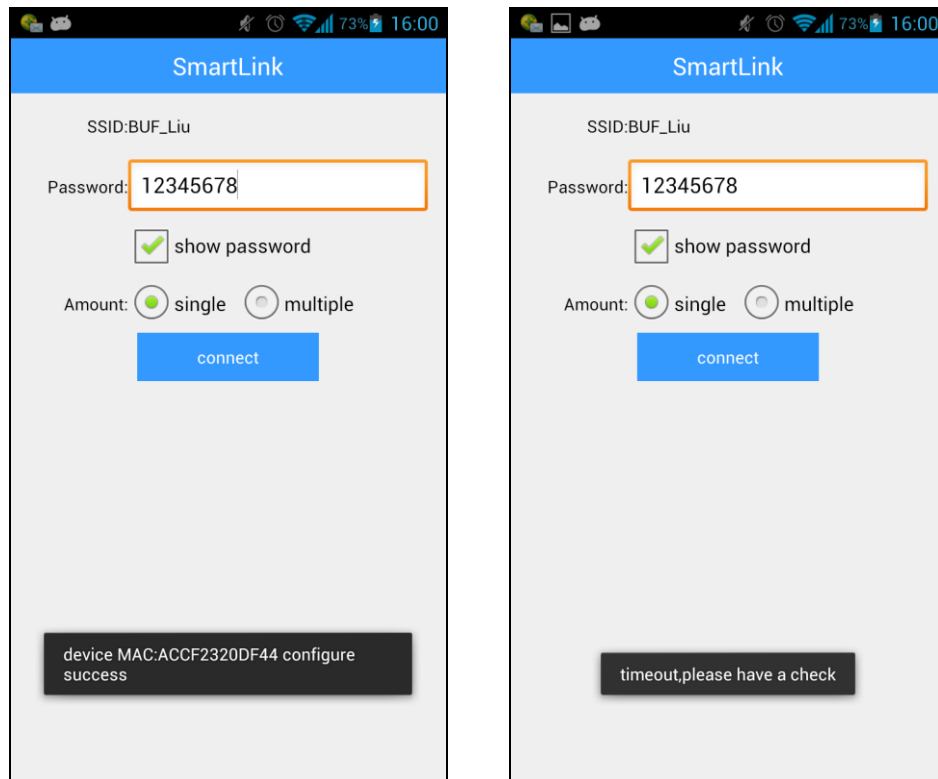

2.3 Amount : Select the number of device to be configured, single or multiple.

A screenshot of the 'SmartLink' application interface on a mobile device. The status bar at the top shows various icons, signal strength, 69% battery, and the time 15:44. The app has a blue header with the title 'SmartLink'. Below the header, the SSID 'BUF_Liu' is displayed. A 'Password:' label is followed by a text input field containing '12345678'. Below the password field is a checkbox labeled 'show password' which is currently checked. Underneath, there are two radio buttons for 'Amount': 'single' (which is selected) and 'multiple'. At the bottom of the form is a blue button labeled 'connect'.

- 3 After the Wi-Fi module is powered up, click the module 'nReload' button to start SmartLink config mode. The module will reboot and the 'nLink' LED is flashing fast indicating the module is in SmartLink configure mode. Quick to execute Step 4.
- 4 Click the APP "connect" button, it will push message to Wi-Fi module, and the APP indicate it is configuring the module and also the module's "nLink" LED is flashing slowly :

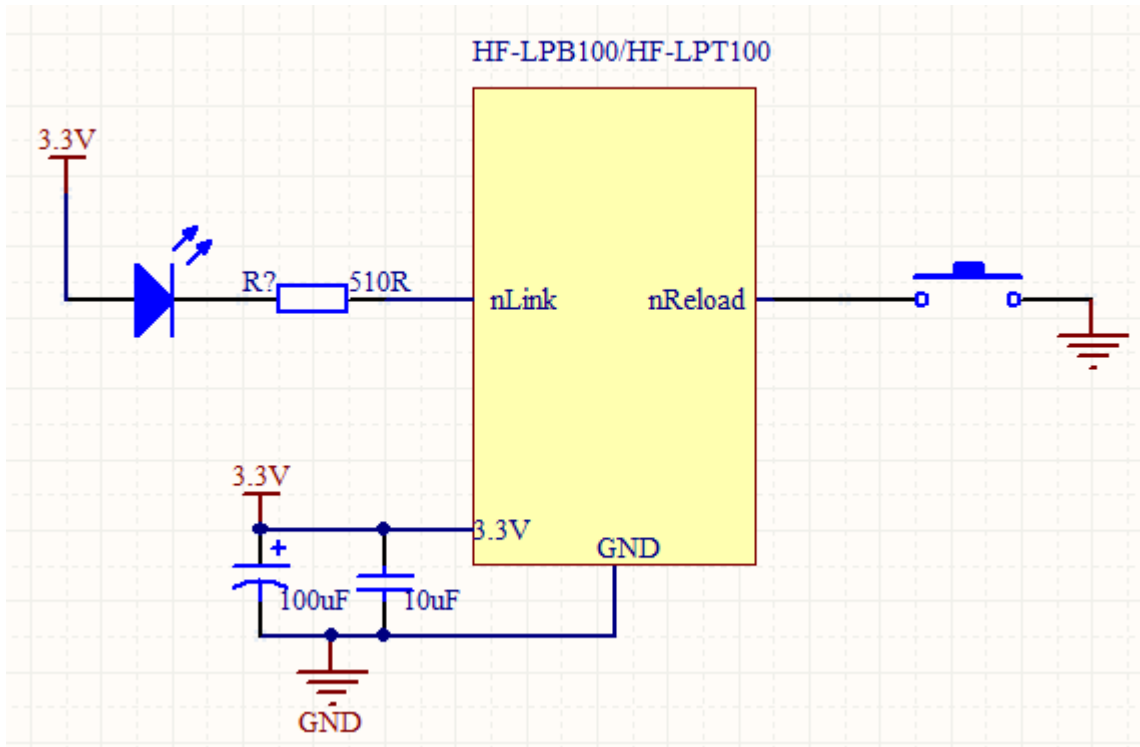

- 5 After the configure process is finished, the Wi-Fi module restart itself and connect to the router in STA mode.
- a) “nLink” LED is on indicating the the Wi-Fi module connect to router successfully and the APP shows configure is OK.
 - b) If the password is error . The “nLink” LED is flashing slowly indicating the configure is failed. Reset the module and configure again.

APPENDIX :

1、 Hardware connection of Wi-Fi module.
